

## Information about the Service

### Service Description

TPG's NBN FTTN M Business Bundle service is delivered via the National Broadband Network (NBN) to the network boundary point of your premises.

TPG NBN FTTN M Business Bundle includes the following components:

- NBN Broadband using the Fibre to the Node network
- Digital Voice Service (no included calls)

The service is a pre-paid service and bills are not issued. A minimum \$20 prepayment is required at registration. As you use the service for calls outside the included value, the prepayment will be automatically topped up when the prepayment falls to a specified dollar amount.

### Availability

The NBN FTTN M Business Bundle is available at selected coverage areas and subject to infrastructure availability at customer's premises. To check for availability, please use the address checker at

[www.tpg.com.au/nbn-business-fttn/coverage](http://www.tpg.com.au/nbn-business-fttn/coverage)

### Bundling Arrangements

Once an NBN FTTN Business Bundle is purchased:

- Change of plan option is restricted to TPG NBN FTTN Business Bundle plans only and you cannot move back to a TPG ADSL2+/ADSL service.
- You cannot separately cancel either component (NBN Broadband or Digital voice). Cancellation will cease both services.

### NBN Speeds

Actual throughput speeds may be slower and could vary due to many factors including type/source of content being downloaded, hardware and software configuration, the number of users simultaneously using the network and performance of interconnecting infrastructure not operated by TPG. Devices connected by Wi-Fi may experience slower speeds than those connected by Ethernet cable. The Standard speed option has a download connection speed which will range between 5Mbps and 12Mbps, and an upload connection speed of 1Mbps.
