Money Back Guarantee

SAVE UP TO **60%** ON YOUR PHONE COSTS!

Built for Australian business, the TPG VoIP PABX is a fully featured system that delivers both functionality and a quality of service that's indistinguishable from traditional telephone systems...but at a fraction of the cost.

ZERO Capital Cost – it's off the balance sheet with no depreciation hassles; Low setup and monthly maintenance fees make a TPG VoIP PABX a truly affordable solution for any organisation needing from four to 400 handsets.

CHEAP Call Costs – 10-cent flat rate calls within & between Australian capital cities*, other Australian locations for 3.99 cents per minute, 28-cents per minute to Australian mobiles within Australia (billed by the second) and international calls from 1.99-cents per minute ...with NO flag fall on any calls.

FREE Inter-branch Calls – all your voice and video calls between the TPG VoIP PABX's in your branch offices are totally free!

Line Rental Reduction – with VoIP PABX you only need traditional phone lines for inbound calls, so you can reduce your lines and lower your line rental costs.

PLUG 'N' PLAY – easy to install and use, and will work on your existing computer network cabling.

30 Day Money Back Guarantee# – try a VoIP PABX system for one month and prove it's quality and value for yourself. If it doesn't suit your needs, then simply return it and only pay for the phone calls.

Contact your TPG Dealer for further information and/or to arrange a demonstration.

+ Each branch must have a TPG VoIP PABX. Total minimum cost over 36 month contract term is \$4359.30 inc. GST (includes setup fee of \$438.90 and monthly maintenance fee of \$108.90; excludes installation). Video handset pictured is additional cost. International calls charged by the minute with 10 cent minimum call cost. Prices subject to change without prior notice; full terms and conditions apply, see www.tpg.com.au/pabx for details. *Hobart and Darwin not included. # Doesn't include call costs. TPG Network Pty Ltd. 65 Waterloo Rd North Ryde NSW 2113. ABN 85 003 064 328

Reliability & Redundancy – the TPG VoIP PABX is Australian designed, built and tested to rigorous standards; however to ensure that your business is always "on line", a second, standby VoIP PABX is supplied and configured at NO extra charge.

Comprehensive Call Reports – "live" detailed reporting is instantly available on your web-browser. You can quickly make informed decisions on reducing costs and/or adding resources.

Handsets – the "Executive Desktop" is the standard handset with upgrade options for desktop video-conferencing or wireless handsets.

Low-cost Broadband – a TPG ADSL2+ 24Mbps/1Mbps broadband connection dedicated to your voice traffic will ensure your VoIP PABX provides the best quality of service, and in other areas TPG's 512Kbps DSL service is available.

Automated Attendant – reduces the load on your receptionist by answering calls instantly and providing your customers with direct access to "known extension" numbers.

Automatic Call Distribution – minimise caller waiting times by routing incoming calls to ensure they are handled by the first available operator.

Voice Mail – tailor your own voice mail and messages; email alerts will keep you informed when you're away from your phone.

Other Features – include Speed Dials, Music on Hold, Call Conferencing, Call Transfers, Mute Calls, up to 11-lines per handset, Headset capability, and many more.
