

Support: Windows 95 & 98

Creating a New Connection for TPG:

Move your mouse arrow over the images and when it turns into a hand, click the left button to go to the next screen.

1. Double-click **My Computer**.

2. Double-click **Dial-Up Networking**.
3. Double-click **Make New Connection** to start the connection wizard.

4. a) Enter a recognisable name for your connection eg **TPG Internet**.
b) Select your modem from the list under **Select a device**.

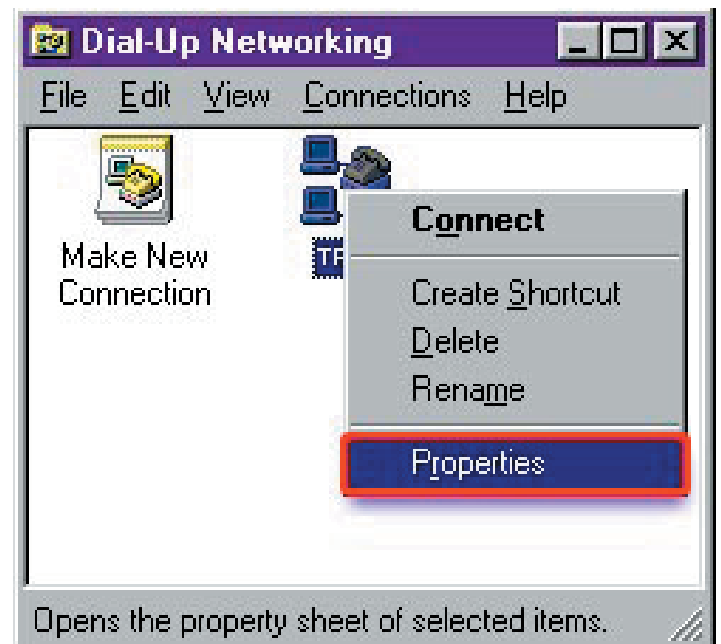

5. a) You do not need to enter an Area Code when dialing a local number. Type your **Local TPG Connection Number** in the Telephone Number section. Leave the Country Code section as default.
b) Click **Next**.

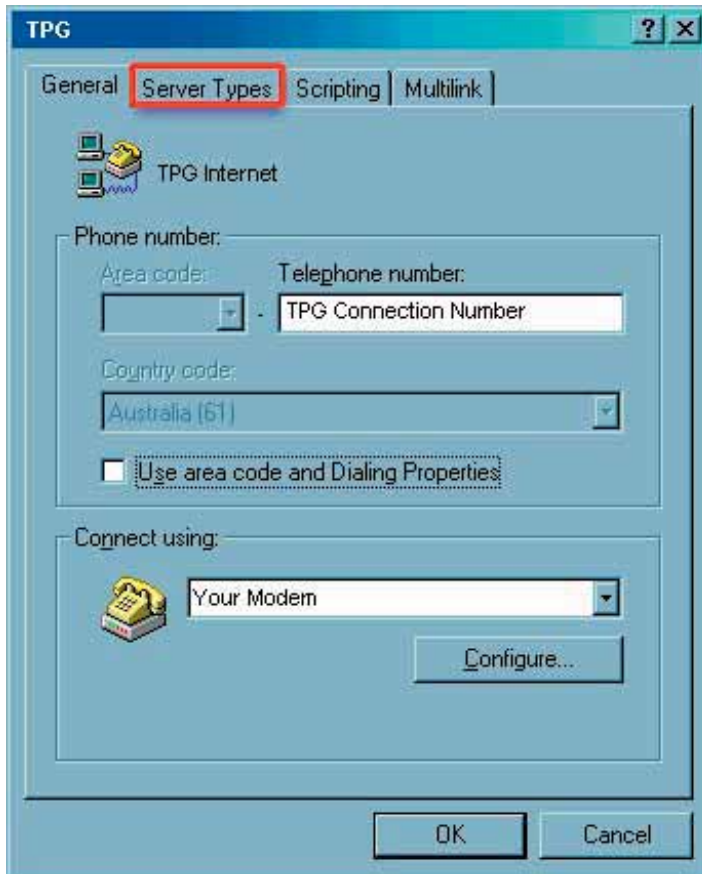

6. Click **Finish** to save the setting and finish creating your connection.

7. a) Back in your Dial-Up Networking window, right-click on **TPG**.
b) Click **Properties**.

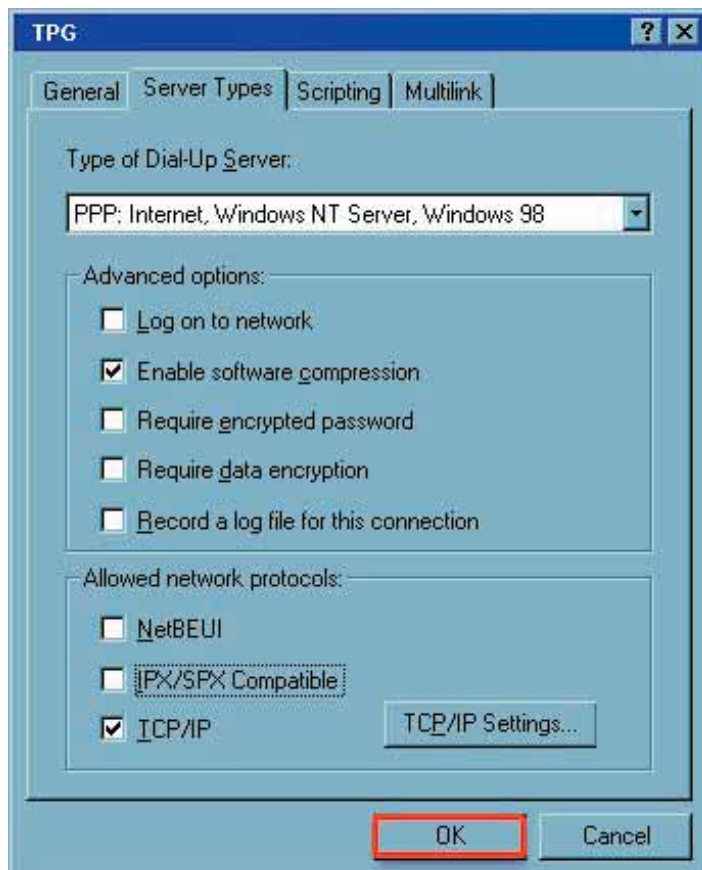

8. a) Remove the check mark next to **Use area code and Dialing Properties**.
- b) Click on the **Server Types** tab at the top.

10. You are now **finished**.

9. a) Remove all ticks except for **Enable Software Compression** and **TCP/IP**. The Type of Dial-Up Server should list the same version of Windows that you are using.
- b) Click **OK**.
