**#NBN Speeds:** Typical Evening Download Speed is subject to change and is measured between 7pm and 11pm. Actual throughput speeds may be slower and could vary due to various factors including type/source of content being downloaded, hardware and software configuration, the number of users and performance of interconnecting infrastructure not operated by TPG, congestion and fixed wireless network limitations. Devices connected by Wi-Fi may experience slower speeds than those connected by Ethernet cable.

**Modem Compatibility Requirements:** You need an NBN compatible modem that is capable of reaching your NBN plan speed.
