TP-Link Archer VR900

Please follow the steps below to set up your TP-Link Archer VR900.

1. Ensure your **NBN Connection Box** is turned on.

2. Plug an Ethernet cable from the **UNI-D1 port** on your NBN Connection Box into the
    yellow LAN/WAN port on your TP-Link modem.
    If UNI-D1 doesn't work, try each UNI-D port.

3. Plug in the power cable and turn your TP-Link modem on using the **Power** button on the
    side of the modem.

4. You can connect devices such as PC desktops, laptops or gaming consoles by plugging
    Ethernet cables from the device to any of the three remaining **yellow LAN ports**, or you
    can connect devices via WiFi.

5. Go to **http://tplinkmodem.net** or **http://192.168.1.1** in your browser.

6. Create a password for future login attempts or log in with your TP-Link modem username and password.
    By default, these are:
    Username: admin
    Password: admin

7. On the home screen, select **Advanced** and **Operation Mode**.

8. Select **Wireless Router Mode**.

9. Click **Save**; and the modem will reboot to save the changes.

10. Select **Basic**, then select **Internet**.

11. Select **PPPoE** as **Connection Type**.

12. Select **PPPoE** from **Internet Connection Type**.

13. Enter your **TPG username** and **password**.

14. Click **Save**.

Once you receive notification that your TPG NBN service is active, your
TP-Link Archer VR900 should now be online. If you are still having issues, please call us on
1300 997 271 for further assistance.
