

TD-W9970 (ADSL2+ HOME BUNDLE)

Mac OS X

IMPORTANT MESSAGE

Your modem has already been pre-configured, you do not need to follow each step of the set-up guide but should retain this document in case you need to manually configure your equipment.

To configure your PC/Laptop with your wireless password including changing your wireless password, please proceed to step 3.

Contents

1. Physical Connection
2. Configuring Modem
3. Configuring Wireless
4. Change of Password

1. PHYSICAL CONNECTION

Have your modem powered on and connected directly to your PC via Ethernet Cable before you begin, as these instructions are based on wired Ethernet connection

For further information, please see wiring diagram and instructions for your ADSL2+ Home Bundle service below.

3. CONFIGURING WIRELESS

- A. Click on the Wi-Fi Icon at the top of your screen. A list of Wi-Fi networks will be displayed
- B. Click on the name of your modem. By the default, the network name should be **WiFi-XXXX** (XXXX is a random 4 digit alpha numeric code). This is written on a sticker on the bottom of your modem

- C. Enter your wireless password. By default, the WiFi password is printed on a sticker underneath your modem (**Wireless Password/PIN**).
- D. Click **Join**.

- E. You should now be connected to your modem

4. CHANGE OF PASSWORD

For security purposes we highly recommend that you change your password if you are using your default or if you believe your password security has been compromised. For password information, please visit www.tpg.com.au/support.

PLEASE NOTE:

Each time your modem is powered on, it will initialize this automated authentication process after which your modem will receive a public dynamic IP address (fixed or dynamic depending on your plan) and DNS settings from TPG.
